An email with this text is sent to each new schedule account holder:

==
I created an account for you on the scheduler - your username & password are both XXX - you should change the password asap by clicking on 'Utilities Menu' (@ upper right of webpage) and then selecting 'edit my account' (in the actions menu along the top).

While you're there, *PLEASE* enter phone #'s where we can reach you if there's a problem with the scanner.

When booking time on the scheduler, please make it clear what fund or study the scan is part of, so it's easy for us to figure out billing (talk to me to come up with a good abbreviation or code for your study). Also, please don't leave 1/2 hr gaps in the schedule, unless it can't be helped (eg, scheduling a 1 hr scan in a 1.5 hr block between two other scans).

Finally, please add yourself to the nic_active & nic_cancel email lists (instructions are at Neuroscape Scanner Lists ) if you're not already on them. The nic_active list is for scanner-related discussions & announcements amongst active users, while the nic_cancel list is where you notify users if you've cancelled an upcoming block. You must send an email to NIC_cancel@listserv.ucsf.edu if you cancel a block within 3 business days of the scheduled time (or if you free up a large block of particularly desirable time further in the future).
