Interesting Cases

Add a unique case, fun imaging finding or novel case that you had presented at the academic half-day. Anyone interested in writing up a specific case from this collection should contact the original presenter or assigned faculty mentor. **Interdepartmental collaboration is highly encouraged.**

*Please remove PHI from files before uploading.*

1. A rare form of interstitial lung disease in a young male with known inflammatory bowel disease. Kyle Almodovar, Martand Chhibber and Dr. Evans
