

Roadmaps

These are the bigger, more complex projects that are currently underway. For more routine fixes and improvements, please see the CDL Pivotal Tracker queues: [Operations](#) (issues, bugs, ingest, harvest) and [Product development](#) (user-facing new Calisphere features).

Service
Calisphere
OAC
Collection Management Systems

Past Projects

Project	Goal	Completed date
OAC / Calisphere contributor help portal	Create a more streamlined, one-stop-shop for OAC / Calisphere / Nuxeo help (including search and user forums)	May 2017
Calisphere Comments Pilot Project (w/ UCR)	Determine the viability of enabling user comments on Calisphere, through a pilot project on a single collection.	February 2018
Calisphere schema.org implementation	Add schema.org markup to items and analyze impact; add to institutions and/or collections	(Work paused Summer 2017)
Nuxeo (UC DAMS) upgrade	Upgrade Nuxeo to version 7	August 2017
LSTA-funded harvest project	Harvest as many additional identified sources into Calisphere as possible by September 2017	September 2017 (but renewed for another year)
Exhibitions editorial framework task force	Develop a shared editorial framework for creating new Calisphere exhibitions	October 2017
Complex Objects 2.0 Design Development	Improve the display of Nuxeo complex objects in Calisphere, including non-image content	October 2017
