

openSUSE Linux Shibboleth Service Provider (SP) Setup

Overview

This document explains how to set up a Shibboleth Service Provider (SP) and integrate it with MyAccess on openSUSE.

Installing

```
sudo zypper ar -f http://download.opensuse.org/repositories/security://shibboleth/openSUSE_$(rpm -q openSUSE-release --qf '%{VERSION}')/security:shibboleth.repo
sudo zypper install shibboleth
```

Generic Configuration

The configuration isn't specific to openSUSE. Please follow the [generic Shibboleth SP setup instructions](#) and return here when you are finished. Note that your shibboleth2.xml file is located in /etc/shibboleth/.

Restarting Shibboleth

Restart the Shibboleth daemon by running this command:

```
sudo /etc/init.d/shibd restart
```
