

Calisphere Comments Pilot

This is a project to experiment with supporting user comments on Calisphere, by piloting a service on a single collection.

Project overview / goals

Tasks

What?	Who?
Explore and familiarize ourselves more deeply with Disqus features and interface	Sherri, Eric
Resolve various policy issues: <ul style="list-style-type: none">• Accessibility (color contrast) for the "Plus" version - e.g. if allusion to accessibility policy and avenues for improvement is deemed sufficient• Export questions<ul style="list-style-type: none">• What are our requirements? Collection-by-collection? In bulk by institution?• What are the concerns here – data persistence vs. service persistence?• What's the max from Disqus?• Is there only export through the interface, or through API (to overcome the max)?• IP for comments	Sherri, Eric
Review terms of service for any other gotchas. See https://help.disqus.com/customer/portal/articles/466260-terms-of-service	Sherri, Brian
Collaborate on customization options, policies, and other set-up. See https://help.disqus.com/customer/en/portal/articles/1264625-getting-started	Sherri, Eric
Test it out somewhere (e.g. oac-dev) and start playing around with it. Note: https://help.disqus.com/customer/en/portal/articles/1053796-best-practices-for-staging-development-and-preview-sites .	Brian, Sherri, Eric
Test the policy documents / project "risks" and maybe a light implementation with an SF community focus group	JJ
Develop general protocol for moderating comments - how do we anticipate doing this? See https://help.disqus.com/customer/portal/articles/466238 <ul style="list-style-type: none">• Clear communications and transparency re: pilot goals and persistence	Sherri, Eric, UCR curators (tech services, etc.)
Add mechanism on Calisphere side to add javascript to only selected collections, and add Disqus code to Klein when ready	Brian / Mark / Amy
Begin moderating live comments	Sherri, Eric, UCR curators
Do a call for participants among the fan community, and perhaps send out a survey or do some quickie UX testing or something? Do they think it's worthwhile? Is it worth upgrading to Pro?	Sherri, Eric, UCR curators
Document issues, refine policies, and evaluate the service and its model for production use by all contributors. This should include some preservation planning / exit strategy for the comments generated.	Eric, UCR curators, and CDL implementation team
