

# Proposed Developer/Metadata Track Topics

 Topics are being proposed and voted upon using a [Google Moderator Poll](#)

- Developer/Metadata Topic Ideas
  - Overview and discussion of the [Portland Common Data Model](#)
    - This could also include an update on Hydra Metadata Working Group progress
  - Dive Into Fedora 4
    - Overview
    - RDF and LDP
  - Dive into Hydra (could be RDF/Linked Data focused)
  - Metadata
    - [Intro and update on Hydra Metadata Working Group](#)
    - Overview of modeling efforts at UCSD (Arwen) and UCSB (Chrissy)
    - Common modeling concerns/needs/alignment discussion
  - Lessons Learned / Shared Best Practices
    - From those with current Hydra implementations
    - Test Driven Development best practices and experience
    - Continuous integration tools, development process
  - Are there coding opportunities to advance larger projects? Community development experience (Sufia Sprints, Fedora 4 Sprints)
  - IIIF, Image Servers, and Page Turners
  - Blacklight / GeoBlacklight discussions for new adopters
