

Resident Teaching Development Program

Link to this page: <http://tinyurl.com/ResTeach>

Introduction

Based on a review of the literature and existing materials, we have identified four key areas for resident teaching skills development, and have developed corresponding resident handout and teacher guide.

We recognize that departments already make efforts to improve resident teaching. Our goal is to align departmental efforts with this new Resident Teaching Development Program to ensure that all residents receive training in these four areas:

- Setting Goals and Expectations for Learners (including review of clerkship objectives)
- Learning Climate
- Clinical Teaching Models
- Giving Feedback

To gauge the success of the efforts and guide improvements, we offer an online [Evaluation Form](#), with an integrated Action Plan to help residents put their new skills into action. In addition, there is an extensive [bibliography](#) of articles related to both resident teaching and clinical teaching.
