

IAM Engineer Position

The UCSF Identity & Access Management (IAM) Team is hiring an IAM Engineer to write IAM web applications! This is a full-time, onsite, one year position.

The candidate must have solid web development experience, and preferably, experience with the Grails Framework, or the willingness to learn (as we use Grails here). Ok, who are we kidding... It would be most desirable if you already have Grails experience and really like Grails!

This position involves working on next-generation IAM projects for credential and user account management. Some of these components have the potential to be part of the open source [CIFER Project](#).

Details about the position can be found on the official UCSF job site:

<http://www.ucsfhr.ucsf.edu/careers/index.html>

Once there, do the following:

1. Click on "Search openings"
2. Enter "37407BR" into the "Keyword" field
3. Click the "Search" button
4. Click on "IAM Engineer"
5. If interested, click on "Submit to job" and begin the application process!

We look forward to reviewing your application!
